

### Dominik Sznajder

PHD

Manager, Actuarial consultant

#### CURRENT RESPONSIBILITY

Dominik Sznajder is an actuarial consultant and manager in the Brussels office of Milliman. He belongs to data analytics team at Milliman Benelux, which supports companies in predictive analytics, data visualizations, data management, processes automation, and big data projects.

#### EXPERIENCE

Dominik joined the firm in 2014. Before that, he was a researcher and lecturer in the field of mathematical statistics for seven years.

Dominik specializes in statistical, actuarial and machine learning modeling. He works in a multidisciplinary environment consulting mainly on modelling topics for life, nonlife and health insurers.

Dominik supports clients in implementation of open source solutions for data preparation, calculation and reporting processes. He is an R and Python trainer. His special attention goes to process automation for operational cost optimization.

#### EDUCATION

- PhD in Mathematical Statistics, KU Leuven, Belgium
- Master in Mathematics (spec. Financial Mathematics), Warsaw University, Poland
- Master in Economics (spec. Informatics and Econometrics), Warsaw University, Poland
