

Fred Vosvenieks

MMATH
Consultant

CURRENT RESPONSIBILITY

Fred is a consultant within the Milliman Life practice based in London. He has completed the required exams necessary for qualification as a UK Actuary. He joined Milliman in 2008.

EXPERIENCE

Fred began his career at HSBC Life in 2005, working in teams responsible for pricing, Embedded Value and IFRS calculations, and statutory reporting. He was directly involved in several of the company's capital management projects. This included project managing the production of the company's 2008 ICA submission to the FSA and the QIS 4 result.

At Milliman, Fred has project managed the production of regulatory returns as well as ICA and Solvency II QIS results for a variety of clients and has been heavily involved in several recent M&A engagements.

Fred has worked on a number of independent expert and expert witness engagements, most recently supporting the Independent Expert on a Part VII transfer.

Fred is providing technical assistance to a variety of clients regarding their Solvency II implementation projects, including completion of QIS5, participation in the FSA's IMAP process, and Pillar 5 review.

Fred has extensive experience of actuarial modelling software.

Fred has spoken at a number of Milliman hosted business forums and recently contributed to a research project on the potential capital impact of the Solvency II regime for the European life insurance industry.

EDUCATION

- MMath, Mathematics, University of Warwick
