

# MyRxConsultant

MyRxConsultant™ is a decision-support tool for payer organizations, healthcare brokers, health plans, and pharmacy benefit managers (PBMs) that enables near real-time claims experience reporting of pharmaceutical claims. The tool processes user-provided pharmacy claims data to generate pharmacy benefit costs and experience reports on demand, allowing the comparison of contracted discount rates and savings. By providing detailed reports, MyRxConsultant empowers users to make evidence-based decisions and reduce costs without having to invest in staff or other outside consultants to manage their pharmacy claims data.

MyRxConsultant provides the following pharmacy benefit costs and experience reports:

#### Summary

- Provides summary of experience including ingredient costs, AWP, and AWP discounts for common formulary tiers

#### Ingredient cost

- Provides indicator of contract performance through comparison of actual ingredient costs with discounted AWP from the contract

#### Experience totals

- Provides detailed summary of experience on a total aggregate cost and per-member-per-month (PMPM) basis, with splits by product type and distribution channel

#### Top drugs by count

- Provides top 50 products by number of claims with experience details

#### Top drugs by total plan cost

- Provides top 50 products by plan paid amount with experience details

#### Top therapeutic classes by count

- Provides top 50 therapeutic classes by number of claims with experience details

#### Top therapeutic classes by total plan cost

- Provides top 50 therapeutic classes by plan paid amount with experience details

#### Top prescribers by total plan cost

- Provides top 50 prescribers by total plan paid amount with experience details

#### Top patients by total plan cost

- Provides top 50 patients by total plan paid amount with experience details

#### Top pharmacies by total plan cost

- Provides top 50 pharmacies by total plan paid amount with experience details

#### INSTANT, EASY-TO-USE ACCESS

MyRxConsultant is an intuitive, easy-to-use web-based tool that allows the access of detailed insight on pharmaceutical claims anytime, anywhere. The product allows the secure upload of pharmacy claims experience data with an automated production of the management reports listed in the table above. Users can run pharmacy experience reporting without the need for detailed knowledge in database management and programming because MyRxConsultant will process the data for them.

#### COST SAVINGS POWERED BY EVIDENCE

The automatically generated and detailed reports improve decision making and auditing by providing experience-based reports, allowing the comparison of contracted discount rates and highlighting the highest cost prescriptions, patients, prescribers, and pharmacies.
