

## Student health insurance consulting

*Understanding your role and opportunity to keep students healthy, enrolled, and on campus.*

Milliman understands the critical student health challenges higher education institutions face: healthcare affordability, quality of coverage, unsustainable medical costs, evolving Affordable Care Act issues, and overall population health.

We can help you transform these challenges into opportunities that will keep your students healthy and improve the cost-effectiveness of your student insurance offering. We are committed to helping colleges and universities offer the best, most cost-effective student health insurance so students stay enrolled, are satisfied, and remain healthy.

### Student health services

As consultants with deep expertise in service to higher education we can:

- Analyze and explain the impact of ongoing healthcare reform and legislative updates.
- Benchmark student medical plan designs and costs with comparator/competing universities.
- Conduct comprehensive and unbiased third-party evaluations of student health proposals and vendors.
- Negotiate and secure best-in-class plan designs, funding options, and rate structures.
- Develop strategies for partnering with university medical centers and systems.
- Conduct audits and operational assessments of student health centers.
- Coordinate athletics/sports injury contracts and travel accident plans.
- Facilitate student orientation sessions.
